QUALITY

Barista quality milk texture

PERFECT MOOSE

"The Perfect Moose is a easy to use milk solution that provides consistent high quality milk every time. It has also increased speed and service to our valued customers.

Perfect Moose is like having an extra pair of hands, in fact this has led to reduced labour costs. Perfect Moose has exceeded my expectations, I wished I had purchased this sooner".

- Ben Dunn, Owner/Managing Director
Balmain coffee company

Perfect Moose is the latest smart, automated milk steaming technology which takes over for the busy barista, reduces training issues and increases output during busy times.

Milk steaming requires a lot of skill, time, feel and practice. Perfect Moose's smart technology gives you that extra pair of barista hands without the need for that extra barista during peak times. No training involved.

Perfect Moose mimics a barista hands moving in and out of the milk to the desired stretch required. Milk texture recipes are set within the RFID chip at the bottom of each smart jug.
